

- 1) Cut out the shape (print or trace onto cardstock for better results)
- 2) Bend/fold the flaps up (towards you)
- 3) Stick a thumbtack or punch a small hole through the center
- 4) Carefully stick it onto a pencil eraser or other mount
- 5) Adjust the fold and/or the mount as needed for smooth spinning.
- 6) Try coloring each wing differently, front and back, and see what happens as it spins.
